

Experience

Procol

Product Manager

Feb 2019 - Jul 2019

Procol, startup that raised \$1 million, is the all-in-one procurement software for commodity industry.

Helped in acquiring contracts more than worth ₹70 lakhs.

Optimised and strengthened our dashboard to increase our session length x 3.

Helped in hiring new engineers in the team.

Planned and guided a team of six to introduce two new features.

Onboarded three FMCG clients.

Adobe

Member of Technical

Staff

Feb 2018 - Sept 2018

Engineered deployment process, reducing deploy time to 5 mins.

Orchestrated team, deployments and two of major releases when a seven year experienced developer was on sabbatical.

Voluntarily organised cultural events, competitions, and aligned a project with a team of three to track progress for various competitions as part of my volunteering work at Adobe Escape.

Zomato

Software

Development

Engineer

July 2016 - Feb 2018

Initiated to break Zomato's website into UI kit, planned and delivered it with a team of three engineers and designers.

Designed and developed Zomato's Alexa skill, It became the most requested skill on Alexa and brought in a lot of marketing by Amazon.

Revamped mobile website into PWA, increasing user retention and driving more users to our mobile Apps.

Introduced AMP project to reduce page load time to less than a second, increasing user satisfaction with slow internet connection.
